SUMMARY

IT Support Specialist with over two years' experience providing Tiers 1 & 2 support to 300+ enterprise users at AWS and NBCUniversal. Proficient in SCCM, JAMF Pro, ServiceNow, Zendesk, Active Directory/Azure AD, VPN, and AWS Workspaces/EC2.

EXPERIENCE

Desktop Support Engineer (Contract) — NBCUniversal | Jun 2024 – Aug 2025

- Resolved 100+ weekly support tickets for corporate office staff, production teams, and media editing departments via Zendesk, improving productivity and satisfaction.
- Deployed updates to 200+ Windows workstations, macOS laptops, and production systems using SCCM and JAMF Pro, ensuring compliance and security.
- Created troubleshooting guides for VPN connectivity, software installations, and printer configuration, reducing repeat tickets by ~30%.
- Performed imaging and deployment for Lenovo, Dell, and MacBook hardware across corporate and creative environments.

IT Support Engineer II — Amazon Web Services (AWS) | Apr 2022 – May 2023

- Delivered Tier 1 & 2 support to engineering teams, product managers, and corporate staff (300+ users) in AWS's fast-paced enterprise environment.
 - Streamlined ServiceNow workflows by creating custom forms, automation rules, and SLA triggers, reducing misrouted tickets and improving consistency.
 - Diagnosed and resolved hardware, software, and network issues across Windows, macOS, and Linux for on-site and remote staff using VPN, RDP, and AWS WorkSpaces.
 - Managed full user lifecycle (onboarding, provisioning, role changes, offboarding) in Active Directory and Azure AD, ensuring compliance with security policies.
 - Provided advanced support for AWS WorkSpaces, EC2, MFA, SSO, and VPN configurations to secure access to cloud-hosted environments.
-

SKILLS

ServiceNow, Zendesk, JIRA | SCCM, JAMF Pro | Active Directory, Azure AD, MFA, SSO | Windows 10/11, macOS, Linux | TCP/IP, VPN (Cisco AnyConnect), RDP | AWS WorkSpaces, EC2 | PowerShell, batch scripting, Python (basics)

PROJECTS

Multi-Cloud Virtual Workspace Deployment — GitHub | Sep 2024 – July 2025

Repo: <https://www.github.com/ramezian1/multi-cloud-workspace-deployment>

- Automated onboarding with Azure AD + AWS SSO using PowerShell & Python.
 - Integrated AD and Azure AD for seamless single sign-on across hybrid environments, improving UX and security.
 - Configured AWS S3 and Azure Blob Storage lifecycle policies for automated archival and compliance.
 - Built Python scripts for monitoring and log analysis to proactively detect performance and error issues.
-

EDUCATION

A.S., Computer Science — College of the Canyons — 2024

B.A., English Literature — San Francisco State University — 2017
