SUMMARY

IT Support Specialist with 2+ years' experience providing Tiers 1 & 2 support to 300+ enterprise users at Amazon Web Service (AWS) and NBC, operating in fast-paced, high-demand environments.

EXPERIENCE

Desktop Support Engineer (Contract)

NBCUniversal

June 2024 – August 2025, Studio City CA

- Resolved 100+ weekly support tickets for corporate office staff, production teams, and media editing departments, improving department productivity and user satisfaction.
- Deployed software updates to 200+ Windows workstations, macOS laptops, and production systems using SCCM and JAMF management platforms, ensuring compliance and security.
- Created step-by-step technical documentation for common troubleshooting issues such as VPN connectivity, software installations, and printer confirmation, reducing repeat ticket requests by 30%.
- Performed system imaging and deployment for Lenovo, Dell, and MacBook hardware used in both corporate and creative production environments.
- Managed ticketing process via Zendesk from initial request through resolution, ensuring timely communication and consistent follow-ups.

IT Support Engineer II

Amazon Web Services (AWS)

April 2022 – May 2023, Los Angeles, CA

- Delivered Tier 1 & 2 technical support to engineering teams, product managers, and corporate staff across 300+ global end users in AWS's high-demand enterprise environment.
- Streamlined ServiceNow ticket workflows by creating custom forms, automation rules, and SLA triggers, improving resolution consistency and reducing misrouted requests.
- Diagnosed and resolved Windows, macOS, and Linux hardware, software, and network issues for both on-site and remote employees using VPN, RDP and AWS Workspaces.
- Managed full user Lifecycle – onboarding, access provisioning, role changes, and offboarding – in Active Directory and Azure Ad, ensuring compliance with security policies.
- Provided advanced support for AWS WorkSpaces, EC2 instances, MFA, SSO, and VPN configurations, enabling secure access to cloud-hosted development and operational environment.

SKILLS

ServiceNow, Zendesk, JIRA, SCCM, JAMF Pro

Active Director, Azure AD, MFA, SSO

Windows 10/11, macOS, Linux fundamentals

TCP/IP, VPN (Cisco AnyConnect), AWS Workspaces, EC2

Power Shell, bath scripting, Python basics

PROJECTS

Multi-Cloud Virtual Workspace Deployment

September 2024 – March 2025

Internal Lab / Self-Direct4d Professional Development | github.com/ramezian1/multi-cloud-workspace-deployment

- Integrated multi-cloud user authentication with ASURE AD and AWS SSO automating account provisioning and achieving a 40% reduction in onboarding time using PowerShell and Python scripts for over 200 enterprise users.
- Integrated Active Directory and Azure AD for Single sign-on Across cloud environments, improving user experience and security posture in hybrid and remote environments.
- Configured AWS S3 and Azure Blob Storage with lifecycle policies for automated archival, reducing manual storage maintenance and ensuring compliance with data retention policies.
- Created automation scripts in Python for system monitoring and log analysis, enabling proactive detection of performance and error issues before they impact end users.

EDUCATION

Associates Degree | Computer Science

June 2023-August 2024, College of The Canyons, Valencia CA

Bachelor of Arts | English Literature

August 2015-May 2017, San Francisco State University, San Francisco, CA
